Right to Work

Settled Status

Full-Stack Software Developer - Laravel, PHP, ReactJS

I'm making a career change into software development as I enjoy coding and get a lot of satisfaction out of problem solving. I've grown up on computers, building computers, and being the go-to person in work and with family for tech. Outside of work I enjoy hiking, camping, and playing board games.

iO Academy Bootcamp - May 2024 - August 2024

I recently studied software development at iO Academy where I worked on both front-end and back-end projects, individually and as part of a scrum team. These can be seen in my portfolio. Below are two of my key projects.

React - Invoicing Web App

The purpose of this project was to build a web app to be able to manage invoices. This was a group project built with **JavaScript**, **HTML** and **Tailwind CSS**, using the **ReactJS** library. **ReactJS** was used as it made groupwork easier to manage with its component structure, which made merging different sections smoother.

Laravel - Bookswap API

The purpose of this project was to build a **RESTful API** for an existing front-end project. This was a group project built with **PHP**, using object oriented programming and the **Laravel** framework. **Laravel** helped us structure the use of the **MVC** design pattern to interact with our database.

Job History

Bathroom Showroom Manager / BBS Plumbing & Heating Supplies Ltd

February 2022 - April 2024, Bristol, UK

In this role I designed and sold bathrooms, as well as managed projects between end user and installer. I managed two staff members directly in my showroom, and headed up a team of 6 employees across three showrooms. I was in charge of training new staff. I managed team operations including regular team meetings to manage workloads and upcoming enquiries.
